

STUDENT SERVICES & ENROLLMENT MANAGEMENT MISSION STATEMENT

It is our mission as staff of the Office of Student Services & Enrollment Management to lead the Division of Student Services & Enrollment Management by facilitating, coordinating, and supporting the delivery of high quality services to the university community. We seek to accomplish that mission by working in partnership with the other staff of the Division, student leaders, faculty, and administration of the university. All of our activities are undertaken to foster and augment the learning experience.

We believe that the Office of Student Services & Enrollment Management should be known as a resource to all members of the university community. To that end, we keep an open door policy and seek to assist students, faculty and staff with their needs. When we cannot meet those needs within our office, we strive to make accurate referrals to individuals in other departments of the university. It is our desire and pledge to serve all members of the university community to the best of our ability.

Finally, we believe that to provide an atmosphere in which learning can take place, all members of the university community must understand and support the policies that are a part of shared governance. To that end, we seek to educate students, faculty and staff about university policies and model support of the policies through our own actions.
